DETAILED ACTION

Election/Restrictions

Applicant's election of Group II, claims 7-11 in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Facino et al.

Facino teaches that a chloroform soluble *Echinacea* extract can be administered to patients, see entire reference, especially, abstract, pages 1448-1450. The extract will inherently induce the expression of a phase II enzyme in a subject since Facino teaches that the same extract as claimed can be administered to a subject.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Facino et al. taken with Braswell et al.

The teachings of Facino are above. Facino does not teach that the extract can come from the aerial part of the plant.

Braswell teaches that *Echinacea* extracts from the aerial and the root portions are well known to be used to treat many different types of diseases and conditions and promote many benefits such as anti-cancer activity, reducing inflammation, cell mediated immunity, etc., see abstract, col. 2, lines 10-65, col. 3, lines 44-52 and the claims.

It would have been obvious to one of ordinary skill in the art to use the aerial part of the plant instead of the root since Braswell makes it clear that the aerial part and the root of *Echinacea* both have many beneficial effects on the body. Further, in an effort to use as much of the plant as possible and not to waste any beneficial materials it also

would have been obvious to use not only the root but also the aerial part of the plant because of its well known beneficial effects.

From the teachings of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.
